

Tej Desale

Data Analyst

tejdesale1718@gmail.com +91 7385796517 Mumbai, India

Summary

Analytical professional skilled in **SQL**, **Power BI**, and **Python** for managing large datasets and providing actionable insights. Experienced in driving content protection and business strategies for high-profile global clients like Amazon and Netflix.

Professional Experience

Data Analyst Corsearch	03/2024 – Present Mumbai
- Manage ETL/ELT workflows to collect and process over 1,000+ weekly data points for clients such as Amazon and Netflix. - Utilize SQL and Python to perform complex data analysis, ensuring high precision in managing large datasets and maintaining data integrity. - Design and maintain comprehensive databases by leveraging advanced data collection and ELT techniques to streamline the ingestion of infringing content violations. - Develop actionable insights and visual reports using Power BI, identifying emerging threats and patterns to improve content protection strategies. - Conduct deep-dive data analysis to provide data-driven recommendations and timely reports on illegal content activity for strategic decision-making.	
Data Research Analyst SEEK Research Solutions	08/2023 – 11/2023 Remote (Contract)
- Executed ETL processes using MySQL to streamline data acquisition from various sources, enhancing overall research efficiency. - Leveraged MySQL to manage and query large datasets, providing data-driven insights and recommendations to optimize business strategies. - Collaborated with cross-functional teams to identify key data requirements and delivered structured reports using database analysis.	

Education

B.E. Civil Engineering VIVA Institute of Technology 9.16 CGPI	2022 Mumbai
Diploma in Engineering VJTI 78 %	2019 Mumbai
SSC (10th) A.V.S Vidyamandir 92.40 %	2016 Virar

Skills

Database Management MySQL, Database Design, Query Optimization	Data Visualization Power BI, Dashboard Development, DAX
Data Processing ETL/ELT Workflows, Data Cleaning, Data Integrity	Programming Python, Pandas, Numpy
Advanced Excel Pivot Tables, VLOOKUP/HLOOKUP, Data Modeling	Market Research Data Collection, Primary & Secondary Research

Projects

Maharashtra Assembly Election Analysis
- Performed ETL on raw election data using Python and Excel to ensure 100% data accuracy for 288 constituencies. - Developed a SQL database to categorize and query alliance-wise seat shares and party performance. - Built a Power BI dashboard to visualize the 81.60% majority stake and geographic distribution of 13+ political parties.
Netflix Content Strategy Analysis
- Engineered a Python script to clean a global dataset of 6,000+ titles, handling null values and formatting inconsistencies. - Executed SQL queries to analyze content distribution, identifying that Movies represent 68.42% of the total library. - Designed a Power BI report featuring global heat maps and time-series charts to track content growth from 2008 to 2020.
